

Full-time Junior Web Developer

You'll work in partnership with our Senior Web Developer to develop projects for new and existing clients, as well as helping in the maintenance of existing websites and legacy systems. You'll be involved in the full life cycle of a project from project planning and build to testing and support.

Our Senior Web Developer will offer guidance and support on every project, but we need you to be confident enough to work independently especially when deadlines are tight or extra support is needed. You'll work closely on projects with our design team, implementing design ideas or suggesting new web technology to adopt.

Due to Covid restrictions remote working is an option, but the ideal candidate will be available to work full-time in our office in Newport on the Isle of Wight. We are fully compliant with current government pandemic guidelines so you'll be safe whilst working from our HQ.

We would wish to employ someone with solid web/design industry experience but we will make exceptions if we feel that you may be the person we're looking for! We will want to see a portfolio of projects that you have worked on to assess your skill levels. Although we would prefer the post to be permanent, we would consider a 6 or 12 month contract.

About Pepper Creative

Although we're a small agency on the Isle of Wight our clients have included big names such as Kenwood, Hovis and GKN Aerospace. We like to keep our clients and projects varied and interesting whether we're developing an e-commerce website or video presentation, or making a brand or creating character illustrations.

Type of employment: **Full-time**

Location: **Newport, Isle of Wight, UK**

Salary: **£21-25K** dependant on experience

Requirements:

- Good time management and ability to meet deadlines.
- Good spoken English and writing skills.
- Ability to understand and discuss basic business and technical requirements.
- Basic Photoshop and Adobe Suite experience.
- PHP 5/7 & MySQL.
- Basic JavaScript knowledge and frameworks e.g. jQuery.
- Knowledge of various PHP frameworks e.g. Laravel, CodeIgniter.
- HTML5, CSS and SASS.
- WordPress experience - Theme/Plugin development.

Desirable but not necessary:

- Some commercial/industry experience.
- App development.
- Experience with modern JavaScript libraries e.g. React, VueJS.
- Cloud experience.
- Tailwind.
- Linux hosting environments e.g. Plesk, cPanel.
- REST API experience.
- Workflow experience such as Git / Github.
- Social Media experience.

We're a friendly bunch and open to new ideas & technology and we're keen to grow, so if you think you have what it takes to fulfil our needs contact us now by emailing darren@peppercreative.co.uk with a full CV, with links to sample projects or a portfolio.

We look forward to hearing from you.
